

### Listing of Claims

Please amend claims 1 as shown below. Please add claims 2-4.

This listing of claims will replace all prior versions of claims and listings of claims in the application:

1. (Currently Amended) A method for scoring a competition between a first team and a second team, in which one of the first team and the second team is the better scoring team and the other is the lower scoring team, the method comprising:
  - a. determining the raw score accumulated by the first team according to the rules of the competition;
  - b. determining the raw score accumulated by the second team according to the rules of the competition;
  - c. comparing the score accumulated by the first team to the score accumulated by the second team to [determining] determine which team is the better scoring team; and
  - d. computing the final score of the better scoring team by adding the raw score of the better scoring team to two times the score of the lower scoring team.
2. (New) The method of claim 1, wherein the step of comparing the score accumulated by the first team to the score accumulated by the second team is performed by a computer processor.
3. (New) The method of claim 1, wherein the step of computing the final score of the better scoring team is performed by a computer processor.
4. (New) The method of claim 1, wherein the steps of comparing the score accumulated by the first team to the score accumulated by the second team and the step of computing the final score of the better scoring team are performed by a computer processor.
